

## BIG-JET Numbering tool

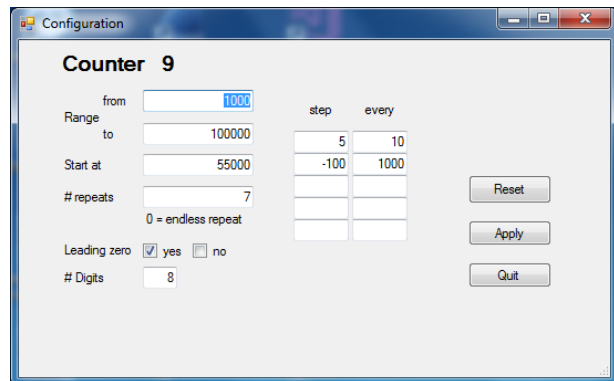

A time saving tool for continuous numbering on labels and tickets, and for inline marking of sheets during paper production, paper finishing or within offset printing machines. Each individual sheet is marked for quality with a permanent serial number, which can be used for tracking.

The specific numbering is defined like a layout in advance and can be saved in any amount as a file. This allows for easy re-production.

### 1. individual setting per counter field

### 2. individual configuration of each counter field

## Maintenance-free system with HP thermal inkjet technology

The print heads can easily be integrated within the production line due to its compact design. With its ecofriendly waterbased inks it is also suitable for pharmaceutical and food production.

Also available for use with solvent based inks and security inks.

- Short setup time and quick cartridge change
- Low ink consumption
- Safe and flexible production
